

Dragonfly

Micro Cam

climb now
work later

Versatile protection for narrow cracks and small pockets. The size 1 Dragonfly is the smallest certified climbing cam on the market. The six cams cover placements from 7.4 to 28.3mm.

FEATURES

- 13.75° camming angle - proven optimum combination of holding power, range and performance
- TripleGrip lobes with a 'raw alu' surface - improved grip
- Ergonomic thumb loop and trigger - easy to handle
- Flexible stem cable - minimises walking
- Narrow head width - fits small pockets
- Compact trigger bar - allows deep placements
- Colour coding - quick and easy identification
- Extendable 11mm sling with compact stitch pattern - extend either strand
- Complement Dragon Cams - size 4, 5 and 6 Dragonfly micro cams overlap with size 00 to 1 Dragons

SIZE CHART

TRIED AND TESTED

For field testing micro cams a better crag than the Main Cliff at Dyer's Lookout would be hard to find. A small team of our climbers headed there in May to try the crag's two test-pieces. Attempting to onsight an E9 it wasn't long before their fall-holding potential was tested. We can report that the two size 1's (green) in a horizontal break on *Once Upon a Time in the South West* passed with flying colours.
